End of Hardware Support Reminder

Dear DR Systems Unity Customer,

DR Systems strives to select only the best third-party software and hardware solutions that maximize the performance of your Unity™ Enterprise Imaging platform, and are cost effective and reliable. Inevitably, sometimes these products are made obsolete and discontinued by their manufacturer. As a result, DR Systems has very little access to spare parts and service support. This is the primary reason for ending support for the products listed below. Starting from the respective dates listed below, DR Systems will no longer cover these products under service contract. DR Systems has continued to support these specific products well past the manufacturer's end of support notification.

<u>Product</u>	<u>End of Support Date</u>	<u>Date of First Notification</u>
Microsoft® Windows® XP	Jun. 30, 2014	notification posted 6/30/12
EMC Centera:	Feb. 28, 2014	notification posted 12/31/12

Please work with your DR Systems Sales Representative for a recommended hardware replacement strategy designed to minimize any disruption in your diagnostic imaging operations. If you are unsure who your DR Systems Sales Representative is, please call sales support at (800) 794-5955 and select option 2. As always, we thank you for allowing DR Systems to serve your diagnostic imaging management needs.

Sincerely,
DR Systems, Inc.

* The Video Capture Catapult is a discontinued product for DR Systems, Inc. TIMS Medical offers a solution that may satisfy a customer's need to capture images through a video signal. Please contact www.tims.com for additional information.
